OLCC / Metrc Approved Integrator List

This document provides the Oregon Marijuana Industry Licensees with a list of third party companies who are participating in the Metrc API integration program.

Companies that have been **Validated** by Metrc, have received training, instructions and have signed the Oregon Data Use Agreement. These companies have demonstrated their ability to perform the functions specified in the validation section of the table. These validated integrators have been provided with access to the Metrc application programming interface (API) and can integrate with each area specified.

Even though the integrators provided in this list have been granted access to the API, **it is the responsibility of the Licensee to enter accurate information into the validated system in order to comply with OLCC rules and regulations.** Neither Franwell nor the OLCC tests or vouches for the member's development and/or quality assurance process, nor the overall feature or functionality of the member's solution(s). The validation process only validates the integrator's ability to perform the specific functions identified. As an example, the validation process only verifies that the Integrator's system has the ability to successfully "put" a package into the Metrc system, it does not validate whether or not the quantity or unit price of the package is in fact accurate. Industry participants will need to work directly with the member to obtain support for their solution. A Licensee may only provide their API key (confidential information) to a METRC validated integrator.

Metrc will add to the list as companies become validated over time. If you have questions about this list or the process of approval or validation, including how your business could become validated, please contact Metrc at api-info@metrc.com.
